

# Project #3

Michael Schoen, Abdirahman Osman, Illya Starikov

Due Date: Tuesday, December 6<sup>th</sup>, 2016

For the second project, we were delighted to be able to use a higher level programming language; we<sup>1</sup> decided to apply this new-found excitement to implement a retro game from the 70s: Space Invaders.

# 1 Project Description

## 2 Problems Encountered

Below we will list some of the “several” problems we ran into.

### 2.1 Memory Constraints

By far, the biggest problem we encountered was the memory constraint. The 8051 has 8 kB of memory; our code base, with the exclusion of all the `malloc`s<sup>2</sup>, it is roughly 25 kB — a size a bit larger than the 8051 allows. Our workaround was to fight fire with fire.

Instead of “dumbing” our game down to get it to fit, we decided to have an external interface; specifically, a port sniffer. It would listen for input from the 8051, and if there is a signal on the serial port, use that as input. If not, default to the keyboard input.

Ultimately, we were unsuccessful with the port sniffer. Originally, we had tried to use a Linux port sniffer so we can just embed it into our program, `slnif`<sup>3</sup>. Unfortunately this port sniffer does not support “legacy” ports, and the 8051 falls in this category. So we moved onto a Windows port sniffer, `Serial Input For Windows`<sup>4</sup>. This too did not work, because we could only have one interface use the serial port, so we would need a dedicated socket to intercept the `COM1` port’s input — something we were not familiar with.

Ultimately, we gave up. \_()\_/\_

## 3 Individual Features

- Michael Schoen — 33% Contribution

– All Game Sounds

---

<sup>2</sup>Since `unsigned char` = 1 B, the terminal window will roughly be 20 height × 80 width, we can roughly expect 1.6 kB to be allocated on the heap; a non-insignificant amount compared to 8 kB.

<sup>3</sup>Can be found at <https://sourceforge.net/projects/slnif/>.

<sup>4</sup>Can be found at <http://www.randomnoun.com/wp/2013/02/03/serial-input-for-windows/>.
